Page-by-Page Breakdown

PAGE 1 — Opt-in / Lead Capture

Systeme.io Page Type: Opt-in page

URL slug: /free-checklist (or similar)

Purpose: Capture email via a free lead magnet. Filter in agents who feel their online presence is lacking.

Lead Magnet Options (pick one):

- “The Real Estate Agent Online Presence Checklist” — 10-point self-audit of their profiles, bios, and visibility
- “The 5 Things Stopping Buyers From Finding You Online” — short PDF guide
- “Your First 30 Days Online — The Agent Setup Roadmap” — quick-start checklist

Recommended: The checklist — it creates awareness of the exact gap VBox AI fills.

Headline:

“Is Your Online Presence Costing You Clients?”

Sub-headline:

Grab the free checklist every real estate agent needs before they update another profile.

Form fields: First Name + Email

Button CTA: “Send Me the Checklist →”

Below button (micro-copy): No spam. Just the good stuff.

Custom HTML section: Full-page opt-in with hero area + form embed code from Systeme.io

PAGE 2 — Thank You / Bridge Page

Systeme.io Page Type: Thank you page (after opt-in)

URL slug: /checklist-on-the-way

Purpose: Confirm delivery, warm them up emotionally, introduce VBox AI as the next logical step. This is a soft sales bridge — not a hard pitch.

Structure:

1. **Confirmation block:** “Your checklist is on its way to [email].”
2. **Empathy paragraph:** Acknowledge the real pain — agents are busy, brand setup falls to the bottom of the list
3. **Introduce VBox AI:** One short paragraph — what it is, who it’s for, what it does
4. **Soft CTA:** “While you wait — see how agents are getting this done without a VA”
→ Button links to the Sales Page

Headline:

“It’s on its way. And here’s what agents do next.”

Body copy direction:

Most agents download this checklist, scan it, and realize they have work to do — but no idea when they’ll get to it. That’s where VBox AI comes in. We take the whole thing off your plate, build it correctly the first time, and hand you finished files ready to paste.

CTA Button: “See How VBox AI Works →”
